Don't Delay.. Dental Care Today!

We hope this newsletter finds you in good health. At Cosmopolitan Dentistry, our primary concern is your well-being, and we are committed to helping you maintain excellent oral health. We want to take a moment to discuss the significance of timely dental treatment and why it's essential for your overall well-being. We understand that life can get busy, and it's easy to put off dental appointments. However, delaying necessary dental care can have unintended consequences. Catching and treating dental issues early and while they are small avoids those becoming larger issues. It also allows us to help you preserve your natural

tooth structure, and avoids unnecessary discomfort. You might be surprised to learn that tooth decay is more than just a cavity or a toothache. It's an infection that, if left untreated, can affect various aspects of your health. By prioritizing timely dental treatment, you're not just taking care of your smile; you're investing in your long-term health and well-being. We're here to support you every step of the way and ensure that your dental care experience is comfortable and effective. Don't hesitate to reach out to us if you have any questions or concerns. Together, let's prioritize your oral health and create a brighter, healthier future.

Fun Facts with Toby the Tooth

Did you know that dogs' teeth are pretty similar to humans teeth? its true! Dogs have a few more than us, but the structure of them is similar! Dogs have 42 teeth while humans only have 32, but they are made up of the same layers. You can see in the image below the different layers of the tooth, we can think about a tooth like a house. The enamel is like the roof of the tooth, it is the outer part of the tooth that covers and protects it. Enamel is even harder than bones! the next layer is the brown part, which is the dentin; this is like the strong walls of the tooth house. The dentin isn't as hard as enamel, but it's still pretty tough. The next layer is that dark red part, in the middle of the tooth, this part is called the pulp chamber. Think of it as the heart of the tooth house. It's where all the important stuff is, like blood vessels and nerves. These make sure the tooth gets what it needs to stay alive. Inside the pulp chamber is the nerves. Nerves are like little messengers in the tooth house. They tell us if something is wrong by sending messages to our brain. When we feel a toothache, it's because the nerves are telling us that something needs attention. Dogs, humans, and some other larger mammals have teeth are pretty similar in this way!

Cosmopolitan Dentistry

Cosmopolitan Dentistry has been happily serving our community for over **25 years!**

A warm welcome to you!
If you have recently or plan to come to our office as a new patient, with your permission, we will thank you in our next newsletter.

Welcome Dr. Schmidt!

Please join us in welcoming Dr. Megan Schmidt to Cosmopolitan Dentistry!

Dr. Schmidt has joined our team as a partner alongside Dr. Luis Cuellar, Jr and Dr. Luis Cuellar, III. We are thrilled to have found someone who shares the same philosophy, experience and sense of personalized quality care we have built so diligently over the years, which is and will be so important to our practice moving forward. Dr. Schmidt really enjoys being a part of the Valparaiso community and has been practicing dentistry for the past 9 years. She graduated from Indiana University School of Dentistry where she met her husband Evan, who is a local Orthodontist. In her free time, she enjoys being with her family, hiking, cooking, skiing and attending professional sports games. She was an Indianapolis Colts cheerleader previously and still cheers for the Colts from afar.

We know you will love her, just as we do!

How Advanced Technology is Advancing Treatment

Same Day Crowns

Using the Cerec milling unit, we're able to provide our patients with convenient and efficient crown restorations. Traditionally, getting a crown required multiple visits to the dentist, with temporary crowns and waiting periods in between. With our Cerec technology, however, we can design, mill, and place custom crowns in just one appointment, saving our patients valuable time and minimizing discomfort.

We've been utilizing our Cerec milling unit for nearly a decade, and its impact on our practice has been remarkable. Not only does it streamline our procedures, but it also enhances the quality and precision of our dental restorations. Our patients appreciate the convenience and high-quality results that this cutting-edge technology provides, allowing them to enjoy a seamless dental experience from start to finish.

At Cosmopolitan Dentistry, we are committed to staying at the forefront of dental technology to ensure that our patients receive the best possible care. From digital impressions to same-day crowns, we leverage innovation to enhance your dental health journey. Experience the difference that advanced technology can make in your dental care – schedule your appointment with

Cosmo Club

Enjoy a \$20 discount on your Cosmo Club activation fee when you sign up in person at our office. This exclusive offer is not applicable for online enrollments. Cut out and bring in the coupon above with you to your next appointment to receive \$20 off of your enrollment fee. You can also scan the QR code below but keep in mind that if you sign up online you will not be eligible to receive the \$20 off.
